2) 、 playback: this device support playback in mobile phone,open the Yoosee software:click Device->Device name->playback, user can find the playback files according to the date, then play it directly .

## 7、 Mobile phone zone settings

1) 、 Alarm learning code.

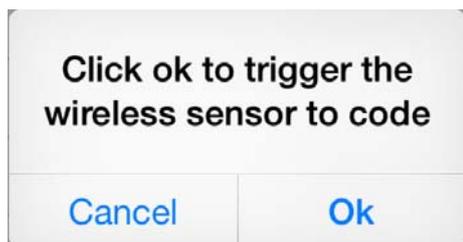

**Note: this function is optional,please be sure your device has this function.**

This device with 8pcs remote control ,8\*8=64pcs wireless

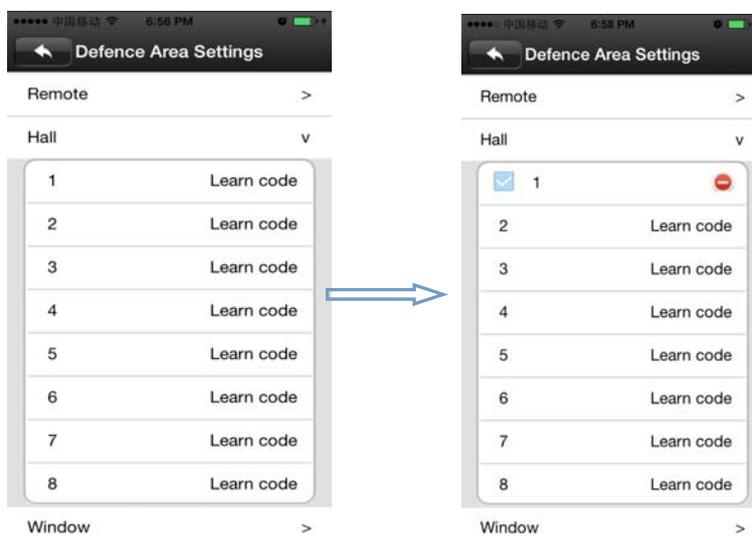

alarm(433frequency),support 8 groups.

The following is the learning code ways:

- A、 Please add device to device list in Yoosee software.
- B、 Click Device->device name->settings->zone settings
- C、 Eg:you want to learn one door sensor that installed in the hall,the serial number is 1.Click “Hall”-click number 1,pop-up:

Click “confirm”, and trigger the alarm you will learn at the same time(take the door sensor as example,separate the door sensor will trigger the alarm).if match code successfully,the words will be turn blue from gray,and will pop-up :learn successfully”.

- D、 Back to device list interface ,click the right lock key of the device, “🔒” means Arming, “🔓” means disarming, the alarm will be effective if mach code successfully after arming 15secs.

E、 “remote caontrol” is special designed for alarm remote control ,the

ways of matching code is the same as “A、B、C”, the function is equal to the right key  of the device list in the Yoosee software, it can be used as “arming,disarming”, but it need match with the device learning .

**2) 、 delete match code : click the access number that had learned,confirm delete is ok.**

**3) 、 alarm settings:**

**Arming:** there are two ways :one is through the press the infrared remote control arming key(lock key) that has learned successfully ;two is the arming keys (lock key) in the back of the APP contact list, after arming ,when there is a case, the device will send the alert to the APP actively , and send the scene captured images to the alarm mail at the same time.

**Push account,alarm mail:**Click on the device name - > settings - > alarm settings: add receiving alert APP ID in binding account (open Yoosee software,can be found after clicking on the first"settings" button from right in the lower, can add up to five account), alarm write the receiving alarm email address.

**Motion detecting:** alarm as soon as the scene change.

**Buzzer:** open the buzzer, when have alert the device itself will sirens screaming until "disarming".

## 8、 Device upgrading
