FAQ

Link DSS Pro

Link DSS Pro | Topology Diagram

IP Speaker devices need to be added to the platform for management.The device needs to be authorized before use (one license for each device)

Formal License Rules	License Type	No.
One IP Speaker device license for DSS Professional V8, no prerequisite.	device	2.9.03.01.10130

Link DSS Pro | Add IP Speaker device

- Open the DSS interface and switch to the [Configuration] interface
- Click [Device] in the configuration interface to enter equipment adding

- 3. Select the Add Device interface
- 4. Select the target organizational structure node to add
- 5. Click [+Add] to add equipment

- 1. Click Device Configuration to configure a single device
- 2. Configure offline alarm
- 3. Update the audio file (if the audio file on the IP Speaker device is updated, you can click Update to synchronize)

Link DSS Pro | Event linkage audio output to IP Speaker configurational hua

 Configure the alarm event, select the linkage IP Speaker channel, and select the play file.

Note:

- 1. Link up to 16 audio files
- 2. If the IP Speaker audio file is updated, go to [Device Configuration] to update the audio file

Link DSS Pro | Video channel shouting

①Click the video channel [intercom] button to initiate voice intercom;
②If the video channel is bound to the IP Speaker channel, it will directly talk to the IP Speaker.

Link DSS Pro | Radio shouts

①Drag the IP Speaker node in the organization structure to the video window
②Click the [intercom] button to initiate intercom

Link DSS Pro | Event linkage intercom

①Click the [Intercom] button in the video pop-up window to initiate voice intercom;
②If the video channel is bound to the IP Speaker channel, it will directly talk to the IP Speaker.

Link NVR

NVR version basic information Product name : NVR5XXX-4KS2 Series\ NVR5-EI Series

Other models : If other models of NVR need customized versions, contact the NVR product manager Supporting baseline plan : The second half of 2023

Upgrade guide

The upgrade method is the same as the baseline version.

During the upgrade, the equipment will stop relevant services: video recording, network preview, etc. After the upgrade, the device returns to normal after restarting.

Do not power off during the upgrade process, otherwise the equipment will not start normally.

Link NVR | Add IP Speaker device

1. Enter the NVR device NETWORK ->IP Speaker menu

2. Add IP Speaker manually: click the [Add] button, and the following dialog box will pop up. Fill in the IP Speaker connection information and Binding camera information correctly.

Note:

The maximum number of video channels that can add IP Speakers is NVR

Link NVR | Event linkage audio output to IP Speaker

Support the event of alarm linkage audio and output to IP Speaker

FAQ

Third party platform docking instructions

Provide a standardized open interface for IP Speaker device management and use

03

FAQ

DSS Platform Docking Instructions NVR docking instructions Third party platform docking instructions

Q What is the default value for ONVIF protocol?

1000

Α

TF card expansion space provided on the back of the product.

- Q When can NVR have a baseline model?
- A Currently, the plan is for the second half of the year. It is temporarily recommended to provide a customized process before shipping.
