OSID Open-area Smoke Imaging Detection

Product Overview

Open-area Smoke Imaging Detection (OSID) by Xtralis is a new innovation in projected beam smoke detection technology. By using advanced dual wavelength projected beams and optical imaging technology for early warning smoke detection, OSID provides a cost-effective, reliable and easy-to-install solution that overcomes typical beam detection issues such as false alarm incidents and alignment difficulties.

Key Features and Benefits

- Patented dual wavelength, UV & IR, particle detection
- CMOS imager with wide viewing angles
- Simple installation, commissioning and maintenance
- High tolerance to vibration and structural movement
